

# Analysing MaxQuant Output with R

*Witold Wolski*

*30 September 2015*

## Contents

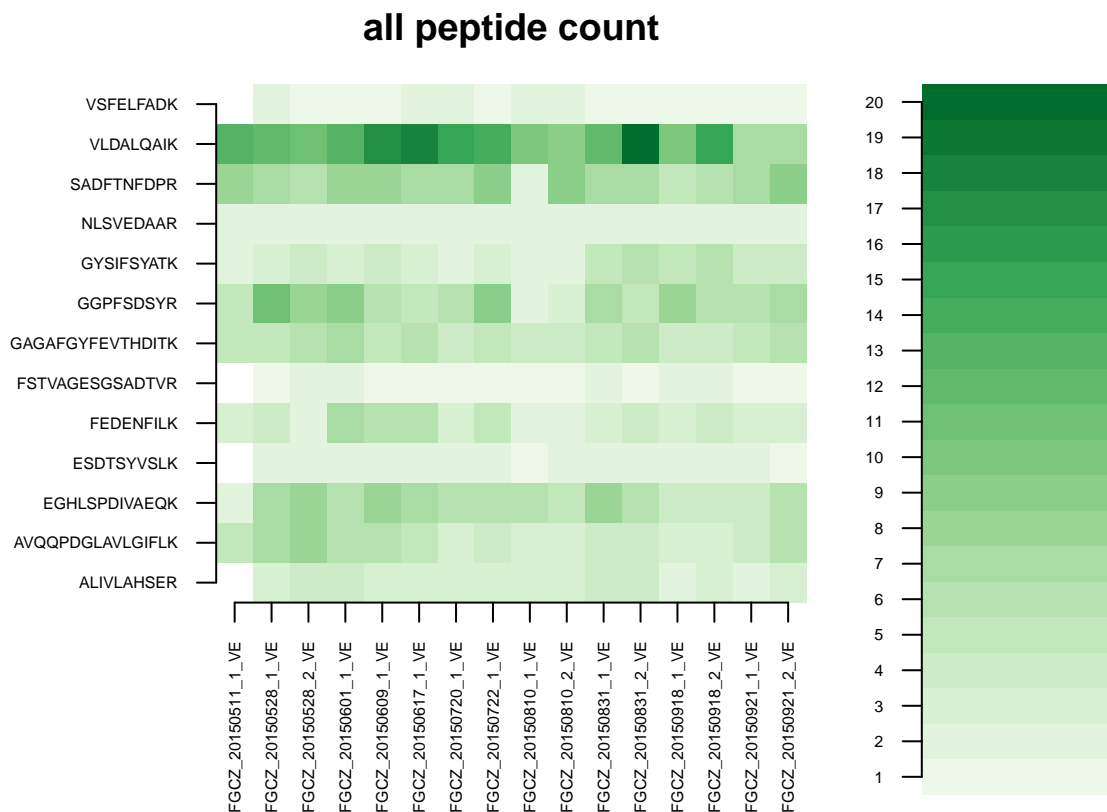

<b>Prepare mrm table</b>	<b>1</b>
<b>Dump maxquant txt files into sqlite database</b>	<b>2</b>
<b>Peptide Evidence</b>	<b>2</b>

## Prepare mrm table

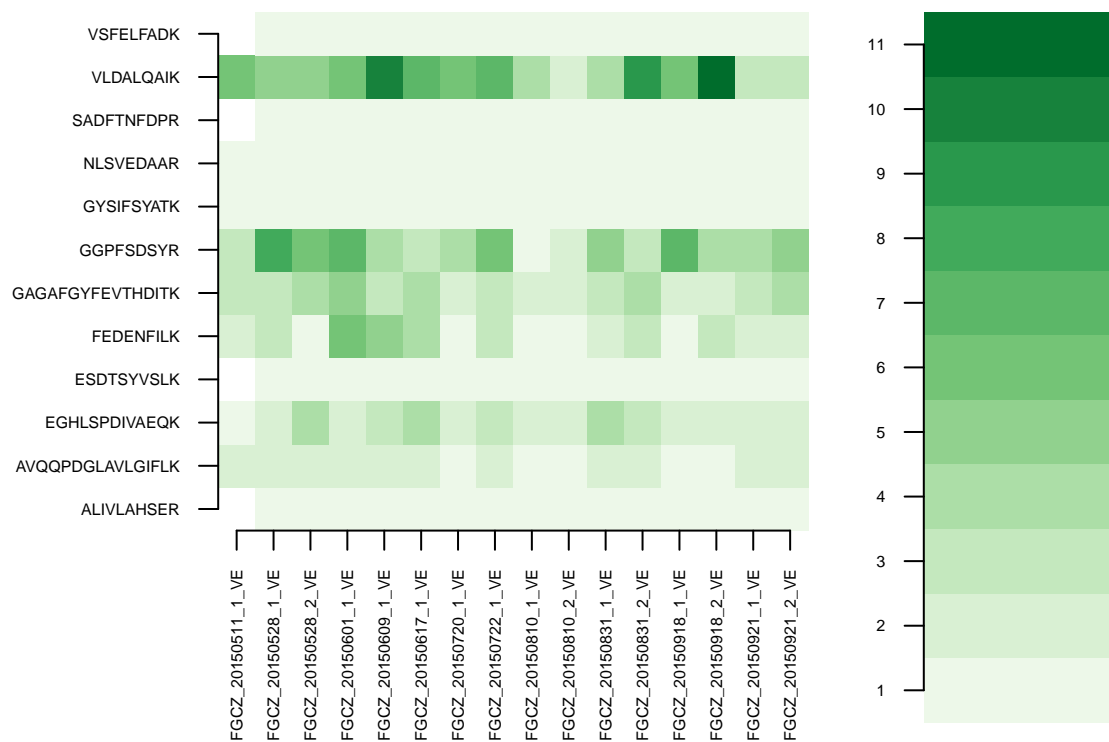

- nr of assigned spectra (MS2) / versus total spectra
- How many H/L target peptides are identified
- Ratio among H/L of the target peptides
- Intensity of heavy or light over the runs

Dump maxquant txt files into sqlite database

## Peptide Evidence

## labeled peptide count

# not labeled peptide count
